Dudley roads are kept moving with Ultracrete Permanent Pothole Repair

With the latest bad weather across the United Kingdom almost every council has been affected with the severe snow and frost. The worst winter in thirty years has left many roads damaged as a result of “freeze-thaw”.

Dudley Council’s Street Care Express Highway Teams in Dudley Borough have been doing an excellent job at overcoming the “freeze-thaw” effected roads and are repairing potholes with Ultracrete’s Permanent Pothole Repair, even in temperatures as low as -3°C.

Ultracrete Permanent Pothole Repair (PPR) is a suitable solution for roads, pavements, driveways and car parks where potholes need filling. The product can be trafficked instantly in wet, freezing and hot conditions whilst at the same time is compatible with the existing road surface.

A simple 4-step application method: 1) Ensure pothole is free of debris and standing water, 2) Apply Ultracrete SCJ spray sealant to pothole edges, 3) Apply the product slightly proud of the pothole, 4) Compact with a hand tamper, provides any contractor with a quick and effective way of repairing potholes.

Packed in 25kg contractor friendly plastic containers that are recyclable, contractors have a quality product that can be applied immediately – helping towards reducing the amount of potential damage claims as well as providing an environmental solution when signing up for Instarmac’s free Plastic Containers Recycling Scheme.

For further information on Ultracrete Permanent Pothole Repair (PPR) or other products from the Ultracrete range of mortars, cements, concretes and surface sealants, or to sign-up for Instarmac’s Plastic Containers Recycling Scheme contact the Instarmac® Group plc, Danny Morson Way, Birch Coppice Business Park, Dordon, Tamworth, B78 1SE.
